

**CRICKET**  
It is played in a fenced-in field  
You have two sides, one out in the  
field and one in.  
Each man that's in the side that's  
in gets out and when he's out  
he comes in and the next man  
gets to catch him out.  
When they're all out the side  
that's out comes in and the  
other side is out and then  
to get them coming in out.  
Sometimes you get out and  
out out out.  
When both sides have been in and  
out, it's called the next out—  
That's the end of the game

# CRICKET

AS EXPLAINED TO A FOREIGN VISITOR

You have two sides one out in the field and one in.

Each man that's in the side that's in goes out and when he's out he comes in and the next man goes in until he's out.

When they are all out the side that's out comes in and the side that's been in goes out and tries to get those coming in out.

Sometimes you get men still in and not out.

When both sides have been in and out including the not outs —  
That's the end of the game

HOWZAT!
