

BOATS AND BALLS!

Duncan Hall on flooding problems

The ground is vulnerable to flooding. The river is nearby and we've had to call on the environmental people from Todmorden to have a look. Obviously, in winter flooding is no problem but when it happens during the summer it is!

Because the ground is so close to the river, we have had a net, a canoe and a little boat on hand to rescue lost balls! We do lose quite a few balls.
