

DOING IT YOURSELF

Dennis Baldwin on club volunteers

I store my stuff in the garage under the scoreboard and a couple of portakabins near the pavilion. The next job we've got on is to re-roof the scorebox building.

We'll do this job ourselves. We've got a lot of skilled people at the club – electricians, plumbers, joiners. They're mostly in the 2nd XI. The club relies on its members like this. We couldn't survive without it.

Recently we've also had new windows in the pavilion. We put these in ourselves - one of the guys is an electrical contractor. We're also going to put some new lights in too.

I've got 12 wickets here in total. We've got five teams in all – juniors plus seniors – so we need a good selection of tracks. There's also an artificial wicket, which just has to be kept clean.

I have three rollers to work with – light, medium and heavy – and two mowers.
