

In 2007 the state-of-the-art pavilion at Bradford League club Brighthouse gave a permanent home to our exhibition, 'Caught & Bowled: The Story of Cricket in Calderdale c.1800-2000', which had previously been on display at Bankfield Museum, Halifax

HARD TOIL

Early on, immigrants of the district had a hard time adjusting to the hot weather and the long hours of hard work. They often had to work in the fields for long hours.

NUMBERS GAME

Games of chance were popular among immigrants. They often played cards and other games in the evenings. Some games were played for money.

SCREEN TEST

Screen tests were used to check the eyes of immigrants. They were often done in the evenings. Some tests were done for free, while others were for a fee.

CAUGHT A BOWLED

On 25 April 1900, the British ship 'The ...' was caught in a storm. The ship was carrying immigrants and was in danger of sinking. The ship was eventually rescued by a British ship.

INTRODUCTION
A local village built itself better and
bigger - a ground concrete with clubhouse or
pavilion, recreation and enjoyment
in local games these facilities have very humble
beginnings and their development continues
with the growth of the sport and the club.

PAVILIONS & CLUBHOUSES
Early pavilions were known as 'halls' - a
consequence of the time when clubs heavily used
wires for changing or refreshments.
However, by the late nineteenth century, most
clubs used some form of wooden hut until a
permanent form was established. Then a
purpose-built pavilion could be erected.
Today many clubs are taking advantage of
building materials from further south and the
National Lottery to undertake their club major
rebuilding programmes since their foundation.
